

AIRPORT ADVISORY

CF

DATE: December 13, 2002
TO: Airport Tenants
FROM:  King County International Airport Safety Office
SUBJECT: **Winter Operations**

Deicing Procedures

With winter weather quickly approaching, please remember to conduct all deicing activities in an environmentally safe manner. Aircraft deicing is limited to designated wash pads that drain into the sanitary sewer system. If deicing needs to be conducted outside of designated wash pad, the operator must obtain prior approval from the Airport Environmental Engineer before commencing the deicing process.

Snow Desk

Snow and ice removal operations will begin when there is an accumulation of snow equaling 1/2" slush or 2" dry snow. If snow and ice removal operations are initiated, the Snow Desk will be activated. The Snow Desk allows ATC, ARFF and Airport Maintenance to remain focused on snow removal operations; therefore, tenants should only call or email the Snow Desk for updated information regarding snow removal efforts.
